

About Me

I'm a UX/UI Designer passionate about crafting intuitive and visually compelling digital experiences. My expertise lies in designing dashboards, websites, and landing pages that seamlessly balance business objectives with user needs.

I create adaptive interfaces that ensure a smooth and consistent experience across all devices. Managing multiple projects simultaneously, I maintain high design standards while adapting to evolving priorities.

My diverse background in 3D modeling, retouching, branding, and illustration enhances my ability to approach design challenges creatively and develop innovative solutions.

Professional Experience	Uplatform UX/UI Designer 2025 – Present Uplatform is a comprehensive digital platform serving both business clients (B2B) and end-users (B2C), where I contribute to enhancing user experience and interface quality across multiple product areas. Product Design (B2C): - Improve UX and UI of the public website, making it clear, modern, and easy to use on all devices. - Work on new features and test ideas to make the product more user-friendly and effective. Product Design (B2B): - Design and update complex admin interfaces for business clients. - Simplify workflows and improve usability in high-load areas. Team Collaboration & Process: - Work closely with product managers, business analysts, and developers to define priorities and deliver solutions. - Set up smooth communication with the development team to ensure accurate design delivery. - Take part in hiring, onboarding, and supporting new designer. - Help organize team processes and improve collaboration between designers and other departments. Design System & Quality: - Refactor and improve the design system for better consistency and scalability. - Review design after implementation to keep high visual and UX standards. Anveo Ventures UX/UI Designer 2022 – 2025 - Created and maintained responsive websites for all device types, ensuring seamless functionality across platforms, which led to increased user engagement through improved cross-platform integration. - Managed 3+ projects simultaneously, including dashboards, websites, and landing pages, while maintaining high quality and adapting quickly to changing priorities in an Agile environment. - Conducted competitor research to uncover industry trends and insights, building user personas that guided effective product strategies, improving design relevance for target audiences. - Played a key role in refining MVPs, delivering three optimized product versions ready for market entry by leveraging team feedback and competitive analysis. - Collaborated closely with developers and stakeholders to ensure design work aligned with technical requirements and business goals. - Designed new features and maintained existing products, honing self-management and teamwork skills. - Delivered visually compelling supplementary materials, such as logos, illustrations, and icons, ensuring consistent branding across all assigned projects. “Rialto” Turn-key interior Designer 2017 – 2022 - Developed bespoke interior solutions tailored to client needs, contributing to successful project outcomes. JSC "Keramin" Designer 2016 – 2017 - Collaborated within a large cross-functional team of 50+ members to ensure smooth and cohesive project execution. - Communicated with clients to gather feedback, align expectations, and ensure overall satisfaction with the delivered solutions.
